

Math 1A De Anza College, Cupertino. Quarter- Winter 2023

Course: Math – D001A25Z – Calculus 1 CRN # 31761
 Time: MW, 4:00 p.m. to 6:15 p.m. Room – online ZOOM meetings.

Prerequisite: Math 31,32.

Texts and (1) Calculus Early Transcendentals, 9th Edition. Author: James Stewart

Equipment: (2) Graphing Calculator. TI-83 plus/ TI 84 plus Calculator.

Instructor: H. K. SHAH. Email: shahhemendra@fhda.edu
 Office hours: MW, 6:15 to 6:45 pm

All exams are show your work type. Final exam is comprehensive, covers all the chapters 2 to 4, and sections 10.1, 10.2.

Web Assign course name: Calculus 1, Math 1A, Winter 2023. HKSHAH, De Anza College.

Attendance: Students are expected to attend all class meetings without tardy. Student with three recorded absences will be dropped from the course. If student decides to drop the course, it is his/her responsibility to drop the course. Student disappearing get F grade. There are 20 points for attendance, for each absence 5 points will be deducted.

Course Objectives: I shall cover chapters 2 to 4, and partially chapter 10. Chapter 1 covers the topics students already have studied in Pre-Calculus. Topics we are going to cover are Limits and Continuity, Differentiation, applications of Differentiation, antiderivatives, and parametric equations. It is an intensive course, needing 8 to 10 hours of study time per week outside the class. We are going to use TI-83/84 plus graphing calculator intensively.

Homework: Students will do homework on internet using Enhanced Web Assign program at web address www.webassign.net/cengage. Web Assign course name and class key are written above. You will access WebAssign homework through CANVAS homework assignments. Follow Module 00 guidelines on CANVAS HOME page to purchase e-book and access to WebAssign. Late homework will not be accepted for grading purpose.

Examinations: There will be three midterm tests, each of one hour, and three quizzes each of 25-30 minutes. Your face should be visible to me during all exams time period, otherwise you will be considered absent in exams. There will be no make-ups for missed exams/final or quizzes. If only one test is missed due to unavoidable circumstance, and the instructor is notified in advance or quickly; the final exam percent will be replaced for missed test percent. If you are not absenting in any exam, the final exam percent will replace your lowest test score (if it helps), provided you passed final exam with score at least 85/130. A comprehensive final examination of two hours will be given on Wednesday, March 29, 2023, during 4:00 to 6:15 pm in our classroom. Students absent in the final exam will get F grade. *All students need to save corrected returned papers of quizzes and midterm exams. I may need it in unusual situation (applicable for face to face teaching only).*

Disruptive behavior: De Anza College will enforce all policies and procedures set forth in the *Standards of Students Conduct* (refer catalogue). Any student disrupting a class may be asked to leave that class. Administrative follow-up may result. Cell phone is not allowed during all the examinations.

Academic Integrity: It is assumed that all students will pursue their studies with integrity and honesty; however, all students should know that incidents of academic dishonesty like cheating and plagiarism are taken very seriously. Students involved in cheating will be dropped and get F for the course. Further disciplinary action by administration will follow.

Grades:

Grade scale	Points range	Percentage range		Examination	points
A+ 4.0	476 to 500	95 + to 100 %		Three Tests	3x75 = 225
A 4.0	456 to 475	91 + to 95 %		Three Quizzes	3x25 = 75
A_ 3.7	436 to 455	87+ to 91 %		Homework	50
B+ 3.3	416 to 435	83+ to 87 %		Class attendance	20
B 3.0	396 to 415	79+ to 83 %		Final examination	<u>130</u>
B_ 2.7	376 to 395	75+ 79 %		Total points	500
C+ 2.3	351 to 375	70+ 75 %			
C 2.0	326 to 350	65+ to 70 %			
D+ 1.3	306 to 325	61+ to 65 %			
D 1.0	296 to 305	59+ to 61 %			
D_ 0.7	276 to 295	55+ 59 %			
F 0.0	0 to 275	0 to 55 %

Student Learning Outcome(s):

*Analyze and synthesize the concepts of limits, continuity, and differentiation from a graphical, numerical, analytical and verbal approach, using correct notation and mathematical precision.

*Evaluate the behavior of graphs in the context of limits, continuity and differentiability.

*Recognize, diagnose, and decide on the appropriate method for solving applied real world problems in optimization, related rates and numerical approximation.
