

Math 1A-46Z (38437) Calculus I, Winter Quarter, 2025

Instructor	Office	Phone	e-mail
Richard Lopez	S44a	864-5661	lopezrichard@fhda.edu

- Textbook:** *Calculus-Early Transcendentals, 9th edition*, by James Stewart
- Materials:** Internet Access. Webassign Homework Platform (must register for Webassign during week 1). TI-83 or TI-84 graphing calculator (or can use Desmos online graphing calculator website).
- Quizzes:** Quizzes will be given (see calendar) on Webassign. **No make-ups. Do not ask.** We will have 6 quizzes altogether of which your lowest score is dropped. **Late quiz submissions will not be accepted. You will receive a 0 if late. Quizzes must be taken on the scheduled dates.**
- Homework:** Homework is assigned for every lesson and is expected to be completed on Webassign. **Homework sections have due dates that are enforced.**
- Exams:** Three exams will be given on Webassign. **No make-ups, no exceptions. Late test submissions will not be accepted. You will receive a 0 if late. Tests must be taken on the scheduled dates.**
- Final Exam:** **The final exam must be taken on the scheduled day not before or afterwards (see calendar). A late final submission will not be accepted. You will receive a 0 if late.**
- Attendance:** **This is a synchronous, online class.** You are expected to be in attendance for every session. Attendance will be recorded automatically. If you have more than 3 recorded absences, you may be dropped from the course by the instructor for lack of participation. However, it is your responsibility to drop yourself if you wish to drop the course. The instructor may automatically drop students who stop turning in work. You must attend the first week of class or you may be dropped. Also, you must have an operational Webassign account working by the end of the first week of class. Failure to do so may result in your being dropped from the class. If you fail to attend the first week of class and/or do not have a working Webassign account by the end of the first week of class, you will not be allowed to make up any missed work.
- Grades:**
- | | |
|-----------------------------|--------------------|
| Exams | 55% of your grade |
| Quizzes & group assignments | 15% of your grade |
| Homework | 15% of your grade |
| Final exam | 15% of your grade. |
-

Your final grade is determined by your overall percentage of points obtained for all tests and assignments and then weighted as stated above. The final grade breakdowns will be as follows:

[97,100] : "A+" [93,97) : "A" [90,93) : "A-" [87,90) : "B+" [83,87) : "B"
[80,83) : "B-" [77,80) : "C+" [70,77) : "C" [60,70) : "D" Below 60% : "F"

Monday	Tuesday	Wednesday	Thursday	Friday
6-Jan	7-Jan Sect 1.1 & Handout	8-Jan	9-Jan Sect 2.1 & 2.2	10-Jan
13-Jan	14-Jan Q1 Sect 2.3	15-Jan	16-Jan Sect 2.5 & 2.6	17-Jan
20-Jan	21-Jan Sect 2.7	22-Jan	23-Jan Q2 Sect 2.8	24-Jan
27-Jan	28-Jan Test 1 Sect 3.1	29-Jan	30-Jan Sect 3.2 & 3.3	31-Jan
3-Feb	4-Feb Sect 3.4 Q3	5-Feb	6-Feb Sect 3.5 & 3.6	7-Feb
10-Feb	11-Feb Sect 3.6 & 3.9	12-Feb	13-Feb Sect. 4.1 Q4	14-Feb
17-Feb	18-Feb Sect 4.2	19-Feb	20-Feb Test 2	21-Feb
24-Feb	25-Feb Sect. 4.3	26-Feb	27-Feb Sect. 4.4 Q5	28-Feb
3-Mar	4-Mar Sect. 4.5	5-Mar	6-Mar Sect. 4.7	7-Mar
10-Mar	11-Mar Sect. 4.8 Q6	12-Mar	13-Mar Sect. 3.10 & 4.9	14-Mar
17-Mar	18-Mar Test 3	19-Mar	20-Mar Sect. 10.1 & 10.2	21-Mar
24-Mar	25-Mar	26-Mar	27-Mar Final Exam	28-Mar

- **It is your responsibility** to know the following policies for this class. These policies are part of the syllabus and will be strictly enforced. By enrolling in this course, you as the student agree to accept these policies and to follow them **and** agree that **the instructor reserves the right to drop a student from the course with a W if any of the policies are violated.** Further action may also be taken against a student who violates specific policies, such as the policy on cheating.
1. Any type of disruption committed during lecture is not allowed and disruptions will not be tolerated. Disruptions include but are not limited to: Talking during lecture; leaving the classroom during lecture; entering the classroom late in a way that disrupts the class. Disruptions such as these interfere with other students' ability to listen and learn. If you cause any disruptions during class, you will receive a warning both verbally and via email. If you cause a second disruption, you will receive a second and final warning. If you cause 3 disruptions during the quarter, you will be dropped from the course. Please be mindful of this rule. It is contained in writing in this syllabus and fully enforceable.
 2. Tests and quizzes are usually given at the end of class and must be completed by the time class time expires. You will receive a two minute warning before your time is fully up. When class time has expired, you must **put down your pencil or pen and stop writing immediately.** If you do not stop writing immediately, your test or quiz may **not** be collected and you may receive a grade of 0.
 3. On test days, you may be assigned a seat by the instructor different from the one you are used to sitting in. If you talk or communicate with another student, you will be moved to another desk immediately. **Students are required to sit in the desks that are furthest toward the front of the room.**
 4. **Cell phone usage of any kind is not allowed during tests and quizzes.** If your phone rings during a test, **5 points will be deducted from your score, so make sure your phone is turned off.**
 5. Restroom visits and other reasons for leaving the classroom during test and quizzes are not allowed. Arrangements for special cases, such as medical reasons, must be discussed with the instructor **before** a test or quiz starts.
 6. Once a test and quiz has been handed out, or during the time a test or quiz is being handed out, **any kind** of cell phone or other electronic device usage is not allowed, especially the taking of pictures. Students are required to **turn off all electronic devices before** any tests, quizzes, or the final exam is given and to **not** have their cell phone or electronic device in their lap. The instructor will walk around the room and closely observe students to make sure this rule is being followed. Please do not let this bother you. If the instructor observes a student placing his or her hands beneath his or her desk for an extended period of time, the instructor may ask that student to stand up or move to another desk. **If a student is observed with a cell phone turned on in his or her hands, lap, or other easily accessible place after the student has received his or her test, that student will be considered cheating and will receive a 0 on that test, quiz, or final exam.**

7. Communication of any kind during a test or quiz between students or others is not allowed and is considered cheating. This includes any verbal, written or other communication, as well as **any** type of cell phone usage (including texting) or other electronic device usage, such as a pad or computer. If a student uses any kind of text or notes (written or other) or electronic device during a test when permission is not strictly granted ahead of time, the student will be considered cheating. All tests and quizzes are to be the work of individual students only, unless stated otherwise (we will occasionally have “group” quizzes and other group work) Sharing, comparing or aiding in the formulation of test or quiz answers of any kind is considered cheating. If you have a question during a test or quiz, you are only allowed to talk to the instructor. If you are observed cheating on a midterm or quiz, you will receive a grade of 0 on that assignment and be reported to De Anza Administration.
8. If a student is caught cheating, the instructor reserves the right to assign a grade of F for the entire course or to drop the student with a W from the course. If a student is returned a graded test or quiz and the student changes his or her incorrect answers in order to receive more points, the student is considered cheating and such an act will carry the same consequences as those mentioned above. If you are caught cheating on the final exam, you will automatically receive a grade of F for the course.
9. **Withdrawals** (W's) can no longer be given by instructors past the withdrawal deadline. **Please be aware of this date**. If you wish to take a W for the class, you must do so on or before the withdrawal date.
10. The purpose of office hours is for students to have time outside of class to be able to talk to the instructor for various reasons. Office hours are **not** intended as a tutorial session for students or a place for students to complete their homework.

Reasons for office hours:

- a. The student needs to talk to the instructor about his or her grade, absences, assignments due, test taken, or anything related to his or her standing in the class.
- b. The student needs further explanation, clarification or review of material discussed in class, in the text, or in his or her notes.
- c. The student needs help or has a question about a homework problem **after** the student has attempted the problem themselves.
- d. The student wishes to discuss study skills, note taking skills, or anything that might enhance the performance of the student in the class.

Reasons not intended for office hours:

- a. To ask the instructor to “do” a homework problem for them or to “do” a problem similar to the homework that wasn’t assigned.
- The class schedule given above is tentative and subject to change.

Misc.:

All tests & quizzes are closed book, closed notes unless otherwise stated. Please read the Classroom Policies for additional class rules. Tutoring is available from the Math Resource Center. You may always make an appointment with the instructor if you need help outside of office hours. The final exam is scheduled for **Thursday, March 27th**.

Student Learning Outcome(s):

- Analyze and synthesize the concepts of limits, continuity, and differentiation from a graphical, numerical, analytical and verbal approach, using correct notation and mathematical precision.
- Evaluate the behavior of graphs in the context of limits, continuity and differentiability.
- Recognize, diagnose, and decide on the appropriate method for solving applied real world problems in optimization, related rates and numerical approximation.

Office Hours:

M,W 12:30 PM 01:20 PM In-Person S44a
